

## Welcome

*Even a subtle change in your smile helps you to project an image of self-confidence and high personal esteem. When you feel good about yourself, it shows in your appearance.*

*Today's advanced techniques and materials can make a real difference. Add the skill, experience and commitment of our practice — using a unique combination of science and artistry — and we can literally redesign your smile.*

## We care about people

That's why we are here; caring for patients is our business. We acknowledge their care to be our primary concern.

We value the basic integrity of all people. Enter all relationships with trust. Therefore, we will not be judgmental of anyone, nor their values, and will communicate openly and honestly.

We are committed to excellence, education, and quality service. We believe that we work best as a team. We listen to our patients and develop a synergistic co-operative effort between doctor, patient, staff, and specialist to reinforce the effectiveness of the team.

Based on these beliefs, we believe we can successfully transform your existing dental condition into the healthy smile you have always dreamed of.

Dr. Perry is a graduate of New York University College of Dentistry in 1993, with surgical residency at Mount Sinai School of Medicine and LIJ Medical Center. His practice of dentistry has evolved into more than just the practice of general dentistry.

Dr. Perry is considered a reconstructive dentist. In other words "a gatekeeper" by intergrating all modalities of dentistry into the rehabilitation of your smile. So if you haven't been to the dentist in a long time, just give us a call at 631.654.0707.

## ***What is Sedation Dentistry?***

Dr. Frank C. Perry is an Affiliate of Pleasant Dreams Dental Centers.

Sedation dentistry means that you will be sedated during your dental treatment. Sedation is provided by an M.D. anesthesiologist who works side-by-side with Dr. Perry during your care. All of your dental treatment is performed while you are in a safe, painless, twilight sedation.

The result is that you feel no anxiety, no fear, no pain, and then wake up after the work is completed. In less than an hour you are ready to leave the office. And best of all, you feel like you had a pleasant nap with little or no memory of the dental appointment. It's safe, it's effective, and it makes possible the care that you so desperately need.

All types of dentistry can be done while you are sedated, from simple cleanings to complete smile make-overs. It's not just the dentistry that you need; it's also the cosmetic dentistry that can make for beautiful and healthy smiles.

For those who want to avoid the inconvenience of scheduling multiple dental appointments, or those who

simply find it difficult to sit for long visits, sedation dentistry is your answer. All your dentistry can be completed in as few as one or two appointments.

Sedation Dentistry is the answer if you have:

- Fear and anxiety about going to the dentist
- Difficulty getting numb by regular "Novocaine"
- Uncontrollable gagging
- Difficulty sitting still for a long time
- Time constraints making multiple dental appointments difficult to schedule.
- Fear of injections
- Fear of the feeling and noise from the dental drill
